

SS-8 - DMX Satellite Station

The SS-8 is a Satellite Wall Station.

Satellite Wall Stations don't store or transmit DMX data; instead, they communicate with the Master Station (an SM-8 or SM-8 Switch), which sends the DMX data to your lights. The SS-8 features eight buttons that allow you to select any of your eight preprogrammed scenes. Programming occurs on the Master Wall Station. Each Master Wall Station can support up to five SS-8 units.

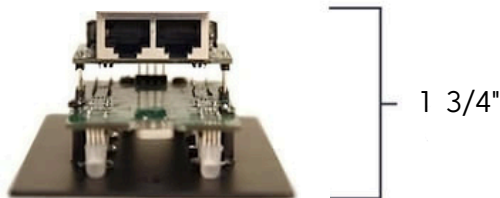

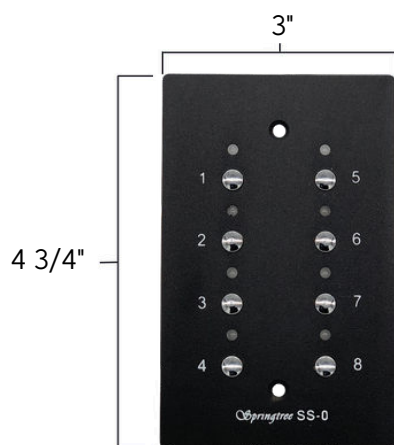

Power & Data

Satellite Stations receive power and data via an affordable and easy-to-use Cat5 cable.

Dimensions & Weight

Weight: .3 lbs

SKU: SS-8

Installation

Wall Stations come with a single gang low-voltage ring. They will not fit in a standard single gang box. Should you need to mount it in a metal-enclosed handy box, please use a Raco 67ORAC box.
